Advice from an expert

When we experience the death of someone we love, a funeral or memorial service fills several important needs.

- A service pays special tribute to your loved one's life, helping us acknowledge the death and remember the life during this naturally difficult time.
- It helps you face the reality of death, a first step toward taking grief from the inside and allowing us to express it on the outside through mourning.
- Friends and family may express the love and respect they feel. Often, just seeing how much others care can help a family adjust to their loss.
- Funerals and services are a means of expressing our beliefs, thoughts and feelings. It helps us acknowledge that someone we love has died and allows us to say goodbye.

The Ocean Reflections, Eco Water Urn, and Journey Earthurns are designed to break down in water. The floating time and timing to break down will vary based on water conditions and temperature. Thus, the urn must remain completely dry until it is placed in the water. Because of the delicate nature of the natural materials, the urn should be handled gently to prevent rips or tears. Do not ship cremated remains within the product.
